CROWDSALE WHITEPAPER

PART 1: PROJECT OVERVIEW

I. THE GISTCOIN PROJECT ELEVATOR PITCH

GISTCOIN is a blockchain-enabled Peer-To-Peer decentralized ledger system for the gamification and monetization of the rapidly evolving Social Media Industry.

Gisthouse, The Project behind the Gistcoin Token crowdsale, is an advanced Audio-based Social Media Platform which is monetized and gamified using a decentralized token to provide lasting solutions to major problems in the rapidly evolving Social Media communities.

GistCoin will be the official means of exchange in this new Audio Conversation ecosystem.

The Core objectives behind the GistHouse Project and the Gistcoin Token sale are:

1. To build a next level Social Media Platform with a blockchain powered peer-to-peer Gistcoin Token as the primary medium of exchange, where:

- a) The Audio Conversation based Social Media Platform will be able compensate Content Creators for creating rooms, managing clubs, and imparting users on audio based social media platforms.
- b) The Platform will gamify the use of the Audio Social Media platforms by content creators and users by offering different token rewards for different milestones and different actions taken by users of the platform (i.e., for opening accounts, for inviting people to the platform, for achieving followership milestones, to compensate best content creators, reward best room attendees etc.)
- c) The Audio Platform users will be able to access premium content by content creators with exchangeable tokens
- d) Content Creators can provide premium content to platform users by charging the convertible Gistcoin tokens for different premium content.

2. Along with raising funds for our next-generation Audio Drop-In Conversation GistHouse Platform, with vast improvements on what consumers currently have with Clubhouse, Twitter Spaces, Green Room etc., we are also going to position our Gistcoin to be the official crypto currency of social media platforms especially the emerging Audio Conversation social platforms, by partnering not just with content creators on those platforms but ultimately with the platform owners.

3. To provide opportunities for our project supporters to acquire tokens that will provide tangible utility for them beyond the normal holding and trading activities in the tokens they get for supporting our project. We will also be allowing our token holders to also use their GISTCOIN Tokens as currency to access premium programs and pay for products and services offered by content owners on the GistHouse platform and other partners in the social

media industry.

The main selling points of the Gistcoin initiative are as follows:

1. GistHouse App brings innovative Solutions to major problems that have limited the potential and maximization of the experience of content creators and platform users in the Social Media Industry.
2. Our Team of Founders, Executives and Advisory Boards include top executives with decades of experience in managing major business projects, and in bringing timely and innovative solutions to different industries including Digital Business, Entertainment, Business, and Stock Trading etc.
3. We have put together a solid Team and Network of Partners with content creating talents, social media power and community management experience to help us achieve the vision - Our team includes highly respected and experienced content creators, celebrities in Business, Entertainment, Personal Development, Investment and Stock Trading, Lifestyle, Politics, Religion etc. These people will also be creating clubs, rooms, and events exclusively for the GistHouse platform.
4. We have put together a solid Technical Team in Web development and Cryptocurrency and who have been involved in all levels of the cryptocurrency world, including mining, token development, trading, and networking with like-minded individuals and communities.
5. We have a Solid Marketing Plan and Marketing Team with requisite experience to increase the value and utility of our Project - Our current association and partnership with Top Influencers on social media have combined followership of over 50,000,000 followers. These top influencers have social media pages (Facebook; twitter; Instagram, LinkedIn and YouTube Channels and pages) that would be massively deployed to create awareness and adoption of GistHouse by users and top content creators all over the world who will see this project as a positive development that will benefit everyone on social media.

III. SOME OF THE DROP-IN AUDIO INDUSTRY PROBLEMS THE GISTCOIN PROJECT WILL SOLVE:

GISTCOIN is a blockchain-enabled Peer-To-Peer decentralized ledger system for the gamification and monetization of the rapidly evolving Audio-Drop in Conversation social media kickstarted by apps such as Clubhouse, Twitter Spaces, Spotify's Green Room etc. The Gistcoin project is designed and created to provide cutting edge solution to the problem of compensation of content creators and social media app users, especially the audio drop-in conversation world.

Some of the direct and immediate ways that GISTCOIN/GISTHOUSE Project will address specific problems in the industry include:

- Create an advanced Audio Conversation Social Media Platform with an inbuilt Creators' and Users' Compensation program.
- Gisthouse will have several features that will address most of the problems associated with existing Audio based social media platforms in the rapidly exploding Audio Conversation industry.
- Provide A Peer-to-Peer monetization Platform that provides direct micro-payments to content creators and premium users on GistHouse and other similar Social Media Platforms in the rapidly exploding Audio Social Media Networks.
- Enable Fair Compensation for content creators and active users of GistHouse Audio Drop-In Platforms.
- Provide Universal means of exchange for users of GistHouse and other partner social media partners.

IV: SUMMARY OF THE GISTCOIN PROJECT

GISTCOIN will power a next generation audio drop-in conversation portal for the Social Media industry as the official means of exchange of premium content and for participation in creating and consuming content on those media. The GistHouse ecosystem, the project that GistCoin Crowdsale will activate, centers on a gamified and monetized Audio Conversation Platform, with GISTCOIN as the central means of exchange.

GISTCOIN allows social media content creators and users of social media, especially the audio based platforms, to gamify and monetize their experience in a way never before seen in the first generation audio conversation platforms like Clubhouse, Green Room, Twitter spaces etc.

With GistCoin, Content Creators on social media can now be immediately compensated through a block-chain powered crypto-currency that can be traded among users and also be convertible into fiat money through several crypto exchanges. Regular consumers of content on the social media platforms, beginning with audio-based platforms, can also monetize their time on those mediums by earning crypto coins for several activities, while also using the platform currency to get access to premium and exclusive content offered by content creators.

PART 2: KEY QUESTIONS AND ANSWERS ON THE GISTCOIN CROWDFUND AND ITS GISTHOUSE PROJECT

Gistcoin will put power in the hands of Creators and their online Communities. Gistcoin offers anyone with an online community to monetize their community without necessarily waiting for the social media Network to provide them the enablement. Gistcoin is on a decentralized platform completely governed by the community. This means that creators and their communities have unfettered control to use the Gistcoin social token across all social platforms.

Who is Gistcoin for?

Gistcoin is a utility token for all influencers, coaches, speakers, trainers, podcasters, streamers, musicians, artists, exerts, professionals, brands, and content creators from all backgrounds who create content on social media and who have communities in other Social Media Networks [and of course the GistHouse Audio Conversation Network). We believe that a decentralized token system allows for all creators - including creators from underrepresented groups - to have direct access to their fans and monetization methods.

What can Content Creators and Members of their User community do with Gistcoin?

An easy way to think about use cases is to evaluate what activities content creators and their communities are currently engaging in that involve traditional forms of payment/rewards/donation and replace that with Creator Coin. Creators get to use their imagination to think of new ways to engage, reward and get rewarded by their communities and are not bound by the limitations of any one platform, as Gistcoin, can be used in all social media platforms as a means of payment and means of tipping and rewarding others.

How do creators and Audio Platform Users use and monetize Gistcoin?

The goal of Gistcoin is to enable creators to unlock an economy around their community and to tap into new methods of monetization that work across multiple platforms. Not only does it create an engaged community who can tip with GistCoin and spend GistCoin to get exclusive access to content, special access, events, and merch, from content creators, it also enables creators to monetize their content in whatever way that pleases them.

Gistcoin allows Content Creators to build a loyal fanbase and get rewarded for creating value for members of their user community.

Some Specific Scenarios for Using Gistcoin

- Creators can use Gistcoin to drive Community Participation.
- Social Media Networks adopting the Gistcoin Cryptocurrency can reward their Creators and most loyal platform users and content creators with the GistCoin token.

- Users can exchange GistCoin for access to premium or exclusive content from Content Creators and other Benefits.
- Fans can hold or exchange these coins for access to private communities, access exclusive content, and purchase physical and digital goods from content creators on social media networks
- As social media economies continue to grow, creators and their communities on Gisthouse can earn weekly network rewards deposited directly back into their economy by the network.
- Social networks that adopt Gistcoin as a monetization token, can issue token rewards to creators and their most loyal fans for helping fuel their networks and for driving growth in their social media economy.

How do creators make money from GistCoin?

The goal of GistCoin is to enable creators unlock an economy around their community and to tap into new methods of monetization that work across multiple platforms. Not only does it create an engaged community who can tip with GistCoin and spend GistCoin to get exclusive access to content, special access, events, and merch, but it enables creators to monetize without paying high platform fees.

It's not just about making money, but also building a loyal fanbase and rewarding them for their support with GistCoin. Creators and their community on Social Media Networks adopting the GistCoin are also able to earn weekly network community rewards in the form of Gistcoin when their community is highly engaged.

Creators and their community can convert GistCoin into Ethereum, USDC, and/or other coins into their crypto wallets. Note: Such transactions may be subject to passing compliance requirements, restrictions, and limitations on amounts.

What are the benefits of Creator Coin to Users of Social Media Networks?

GistCoin allows fans and followers to be a direct part of the social media community by owning a piece of the social economy and allows them to grow together with their favorite creators. By having, holding, tipping, and transacting with the utility coins, fans show their loyalty and support to creators and get exclusive access and premium benefits the creator offers. GistCoin use is also not limited to followers to creator. Platform Users can also interact, engage, and reward one another with user-to-user or follower-to-follower transactions.

How Do You Redeem Gistcoin at Crypto Exchanges?

Unlike ceremonial tokens giving to users on places like Green Room, the Gistcoin and Gisthouse Project will be continuously making it easier for creators to receive real monetary value from their tokens by converting a portion of their coin to other currencies, like

traditional fiat currencies (e.g., USD) or other cryptocurrencies through exchange networks like Ethereum, Uniswap, and other crypto exchanges to help make this a seamless experience for creators.

ADVANTAGES OF GISTCOIN TO THE SOCIAL MEDIA COMMUNITY

1. Create an advanced Audio-based Social Media Platform with an inbuilt Creators and Users Compensation program and which address most of the problems associated with existing Audio based social media platforms in the rapidly exploding Audio Conversation industry.
2. Provide A Peer-to-Peer monetization Platform that provides direct micro-payments to content creators and premium users on GistHouse and other Social Media Platforms.
3. Enable Fair Compensation for content creators and active users of GistHouse and other Social Media Platforms across the globe.
4. Provide Universal means of exchange for users of GistHouse and social media partners.

V. THE GISTCOIN MVP: HOW THE GISTCOIN POWERED GISTHOUSE PLATFORM WILL ACTUALLY WORK

Here is a brief step by step description and visual presentation of how the concept behind GISTCOIN and GISTHOUSE will work when finished.

- Content Creators, their communities and Users register and interact on GistHouse Platform (and other Social Media Platforms where users and content creators adopt the Gistcoin as a monetization token for their social media and online communities)
- Content Creators are rewarded or compensated by the Audio Network for creating content and engaging users and their community on Gisthouse global community. Users and community members are also rewarded with Gistcoin for activities carried out on the platform (i.e., inviting friends, attending rooms, etc.)
- Content Creators can charge Platform Users and Members of their Audio Network community some tokens for access to for their premium or exclusive contents Content (merchandize, courses, books, special sessions, recordings etc.)
- Users make payments through the portal wallet for content of their choice using GISTCOIN (which can be purchased by fiat money or other currencies available on the platform exchange for those who do not have GISTCOIN)

VI: MAKING THE GISTHOUSE PROJECT A REALITY

We recognize that proposing such a system is quite simple, and that building, testing, and refining it is another matter.

We also recognize that it is not uncommon for new blockchain projects to over-promise,

collect CROWDSALE funding and allocate large sums to the creators, only to fail to produce any tangible results.

Therefore, we have taken the following steps to earn trust:

- We have built a passably functional platform of the proposed Gisthouse Audio Drop-In Conversation system with advanced features to existing audio social media systems, with a demo that anyone can verify as practical and doable within a very short time and are currently testing an alpha version. Invites are available upon request to Content Creators and Users that are motivated to contribute their feedback or effort.
- We aim to provide utility, content and support for creators and users alike from the get-go. We will have a Creators and Users rewards program in place within the first 3 months of introducing the beta version of the GistHouse to the public.

To those ends, within a few weeks of our Token Crowdsale, we will launch our fully functional GISTHOUSE Platform, based on our currently available MVP, which will enable content creators and users to create and publish their content unto our network and allow creator/user experience and payments, as well as give immediate value and utility to our platform users and token holders around the world.

VII: WHY CHOOSE OR USE GISTCOIN?

GISTCOIN is a type of electronic token that can be discreetly exchanged for digital contents, products, and services, and subsequently converted into fiat currency.

- It's a 3rd Party-Independent means of exchange. Payment from Content Consumer to Content Creator can take place without any intermediary.
- Removes national boundaries and local currency issues for free flow of creative content and creative assets. One currency of exchange for content works globally.
- User Anonymity Guaranteed
- Up-to-date encrypted day to day transaction
- Ease of payment for micro purchases and payments for creative works
- Price fluctuation purely by the principle of demand and supply
- Transaction without restriction to fee, time, and space
- Use in all social media platforms internationally.

PART 5: CROWDSALE FUNDS USE AND APPLICATION

The CROWDSALE crowdfunding is being organized to raise the seed funds to execute the GistHouse Project as discussed earlier in this Crowdsale Whitepaper. The funds raised during the CROWDSALE will be applied directly into furthering the development of the GISTCOIN Ecosystem; improving the security of GISTCOIN; Developing the GISTHOUSE Audio Conversation platform; Creating and Maintaining a Creators and Users Rewards Program; Acquiring world class technical and business managers to the GistHouse Platform and generating special creator content for the platform among others.

The overriding goal of our activities, investments, and business plan after the CROWDSALE will be focused on creating a vibrant GistHouse ecosystem; enhancing the utility value of GISTCOIN for our token holders; and provide amazing utility for our token holders beyond the regular crypto exchange opportunities presented by most tokens.

Our corporate Business Plan calls for 25% of amounts raised to go directly into technology improvements for GISTCOIN and GISTHOUSE Platform and other platforms and structural aspects of our global plan for the GistHouse ecosystem. 15% will go into the execution, development, and expansion of the GistHouse business model and the team behind GISTCOIN. 20% will go into administration, management, and development of the Gistcoin ecosystem, acquiring more GistHouse platform partners, and establishing the platform as the leading Platform of choice for Audio based Social Media Platforms across the world. 35% will go into global promotion, marketing and attracting adoption of the Gisthouse Platform all over the world as part of the plan to enhance the value of our platform and provide additional utility to our token holders which would further enhance and lead to more increase in the value of our tokens. The remaining 5% will go to miscellaneous issues regarding the GistHouse Business and GistCoin development.

PART 6: LEGAL IMPLICATIONS AND PRECAUTIONS

The highly experienced GISTCOIN team has consulted with legal advisers about the potential implications of GISTCOIN Tokens being considered as Securities and have taken extra steps to distance our product from being considered a security. No part of our Crowdsale Whitepaper or any company-created material should confuse the product that we are offering as a security as we are not offering equity ownership, a right to profit, no payment (direct or indirect), or facilitating a “reasonable expectation of profits” from GISTCOIN token.

No part of this document describes the speculative nature of cryptocurrency or reinforces a speculative approach to GISTCOIN Tokens. Buyers of this token are expected to purchase the Token for the purpose of use on the platform which we are developing and access future products which we create, such as GISTHOUSE Premium Features and Premium Content.

While we have designed our product to comply with the SEC rules of the issuing country, there is no guarantee the SEC or any unforeseen entity or regulatory body will not change regulations regarding cryptocurrency. We are also working with a tax attorney to ensure our tax liability is satisfied and meets existing laws.

Please consult with your attorney regarding the implications related to purchases of cryptocurrency and the trading thereof.

PART 7: HOW TO PURCHASE GISTCOIN
